Subject: FW: Roundup Custom for Aquatic & Terrestrial Use vs. Aquamaster Herbicide (EPA Reg. No. 524-343)

Hawaii is considering this product, which may not have the same requirements for keeping people out of the treated area. They sent in a SLITS request.

Subject: Roundup Custom for Aquatic & Terrestrial Use vs. Aquamaster Herbicide (EPA Reg. No. 524-343)

Tom,

After our conversation, I checked the label for the Aquamaster Herbicide. You are correct that the label does not have the Non-Ag Use Requirements box that contains the "Keep people and pets of treated areas until spray solution has dried." statement. The Roundup Custom for Aquatic & Terrestrial Use does have the statement on the label. Since both Roundup Custom and Aquamaster have the same EPA Reg. No. and therefore must be based on the same EPA stamped label, I then checked the PPLS site for the latest EPA stamped label. The EPA stamped label has the Non-Ag box on the label. The uses on the two labels differ somewhat (Roundup Custom has ag uses, Aquamaster does not). But I would think that they would need to retain the Non-Ag box even if they took the Ag box off the label since the Aquamaster has only non-ag uses. I will send in a SLITS request to see what they say.
